## FACT SHEET

### *SUGAR BEET FEED*

**Premium, Bettaflow and Plain Pellets** are suitable for a wide range of stock. They are high in digestible fibre which helps promote stable rumen conditions and stimulates rumen development. Nearly 90% of the fibre is digestible for ruminants and pigs.

Sugar beet feed encourages the intake of less palatable feeds, can improve milk quality and is ready to use without milling or rolling.

**Supaflow** is made up of unground sugar beet fibre with added molasses (as are **Premium** and **Bettaflow** pellets) and a fine coating of palm oil. **Supaflow** has an additional advantage of being utilizable in a range of mechanical handling and feed systems and can be stored in bulk bins.

**Pressed Sugar Beet Pulp** is a moist feed based on sugar beet residue direct from the sugar industry. It is a very palatable, economical energy source which stimulates feed intake and can promote the intake of less palatable feeds. It can be used in complete diets or as a silage supplement when supplies are limited or quality is poor and makes an excellent buffer feed.

#### Typical Analysis (as fed)

	%DM	ME MJ/kgDM	CP	Oil	Fibre	Form
Premium Pellets	89	12.5	9.2	0.4	12	8mm pellet
Bettaflow	89	12.5	8.8	0.4	14	6mm pellet
Plain	89	12.5	8.2	0.4	16.5	8mm pellet
Supaflow	89	12.5	9.2	0.8	12	6mm pellet
Pressed Sugar Beet Pulp	28	13.00	2.6	0.2	5	Moist pulp
