FACT SHEET

ROOTS (Potatoes & Carrots)

Potatoes & Carrots are all valuable ruminant feeds and will enhance forage intakes. They are an excellent source of Starch and Sugar and are highly palatable.

POTATOES Contains good energy and an excellent source of starch. Care should be taken not to over feed as this may encourage acidosis. Small potatoes produce a risk of animals choking and it is advisable to chop them.

Dry Matter	Protein	ME	Sugar	Starch	Fibre	
20%	11%	13.5	8%	62%	4%	
Inclusion rates (%)	Dairy	12	Beef	12	Lamb	0
	Ewe	3	Pig	0		

CARROTS A highly palatable succulent source of energy which is high in beta Carotene. Excessive feeding can colour milk fat in dairy cows or carcass fat in beef cattle.

Dry Matter	Protein	ME	Sugar	Starch	Fibre	
11%	9.5%	12.3	30%	10%	11%	
Inclusion rates (%)	Dairy	15	Beef	20	Lamb	0
	Ewe	5	Pig	0
